Build with Strength Congratulates New Jersey Fire Safety Advocate Governor-elect Phil Murphy on His Victory

Silver Spring, MD – Build with Strength, a coalition of the National Ready Mixed Concrete Association comprised of fire safety professionals, engineers, architects and industry experts committed to strengthening the nation’s building codes and building more resilient communities, congratulates New Jersey Governor-elect Phil Murphy on his recent election victory.

“Governor-elect Phil Murphy’s election victory is a win for the firefighting community in New Jersey,” said Ed Donnelly, president of the New Jersey State Firefighters’ Mutual Benevolent Association (FMBA). “New Jersey faces a number of challenges in the years ahead, but I feel confident that with Mr. Murphy’s leadership, we can better protect the Garden State. Congratulations, Governor-elect.”

In addition to the FMBA, the Build with Strength coalition includes: The Professional Fire Fighters Association of New Jersey; the New Jersey State Association of County Fire Marshals; the Brigantine Beach Fire Company; Burlington County Fire Marshal Bob Carr; and Retired FDNY Fire Fighter and Wall Township Councilman Kevin P. Orender.

Recently, New Jersey has been the site of major fires at wood-framed apartment complexes and structures, most notably in [Lakewood](#), [Maplewood](#), and [Edgewater](#) – the latter displacing more than 500 residents.

Statewide legislation (Assembly Bill 5196/ Senate Bill 3490) drafted to protect residents and firefighters alike from the vulnerabilities that stem from the use of combustible materials would amend New Jersey’s construction code for fire safety reasons. Specifically, the legislation calls for the installation of an automatic sprinkler system in accordance with NFPA 13; measuring the number of stories from the grade plane; using noncombustible materials for construction; and installing a fire barrier with a fire resistance rating of at least two hours that extends from the foundation to the roof.

The legislation has been supported by a number of organizations and voting bodies throughout the state, including, most recently, the Essex County Board of Chosen

Freeholders, the governing body for the County of Essex, which [adopted a resolution](#) on November 1st supporting the bill and stronger building codes for the state.

"Congratulations to Governor-elect Phil Murphy, whose values and ability to work with everyone will be good for the people of New Jersey," said Dominick Marino, president of the Professional Fire Fighters Association of New Jersey (PFANJ). "We look forward to working with Governor Murphy on issues that have been ignored and detrimental to the Firefighters and emergency medical personnel in recent years, including the necessity for stronger building codes in New Jersey."
