

DUNE LAKES ELEMENTARY SCHOOL

South Walton, FL

Completed: Spring 2019

Project Size: 150,000 sq. ft.

Project Cost: \$35 million

Architect: DAG Architects

Project Owner: Walton County School District

A SOLID EDUCATION

Dune Lakes Elementary School was designed with the future in mind. From innovative offerings such as state-of-the-art labs and outdoor learning spaces—to the structure itself—students for generations to come will find Dune Lakes to be a great place to learn.

01. Built with energy efficiency in mind

The insulation that comes with choosing ICFs will result in an electrical load on the school that is 50% less than other schools recently built in Walton County and Northwest Florida.

02. Superior insulation

When you stack foam against concrete, it creates an insulated envelope. ICFs help keep the school cooler, even in the Florida sun.

03. Safety first

Building with ICFs not only improves the safety of a building, keeping students safe in the event of high winds or hurricanes.

04. Long-lasting

Students will enjoy attending Dune Lakes for many, many years to come as concrete is designed to last for centuries.
